DETAILED ACTION

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The closest art known to the Examiner is cited on the PTO 892 and IDS forms of record. None of the references anticipates or makes obvious, *inter alia* forming an opening in the resist layer; etching a via through the opening in the resist layer, where the via extends through the dielectric layer and the anti-reflective coating, thereby exposing the metal layer; and cleaning the via by exposing the via to a plasma that simultaneously removes the resist layer layer, wherein the plasma is formed from ammonia; or etching a void through the aperture in the resist layer through an underlying dielectric layer to expose a metal layer, thereby forming a residue in the void; and removing the resist layer and the residue from the void by exposing the partially fabricated integrated circuit to a plasma formed from a gas comprising ammonia and rinsing the exposed void, as required by the present claims. The terminal disclaimer obviates the double patenting rejection of record. Therefore, the Claims are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
